PROFESSIONAL SUMMARY

Data Analyst and Systems Engineer with 3 years of combined experience in data analysis and software development. Skilled in SQL, Python, Tableau, and Google Sheets, specializing in performance analysis, data validation, and automated reporting. Presented recommendations directly to the CEO, contributing to initiatives associated with 16.7% growth in monthly sales revenue and an increase from 9M to a peak of 19M views per 30-day period (+111%). Automated daily transaction reporting for approximately 200 companies, supporting business decisions with reliable data and clear insights.

PROFESSIONAL EXPERIENCE

Toffee Up Corp

Data Analyst & YouTube Analytics | Remote, United States | May 2025 - May 2026

- Validated data types and metrics, investigated and documented discrepancies between exported records and reported totals, and applied PACE and EDA to a broad range of videos.
- Built an ETL workflow for YouTube Analytics exports using SQL and Python/pandas for data preparation and Tableau for visualization. Analyzed outliers and Pearson and Spearman correlations.
- Analyzed performance and revenue across four YouTube channels with approximately 10 million subscribers combined; prepared analyses and charts in Google Sheets and Excel and presented findings and recommendations directly to the CEO.
- Used audience segmentation and competitor analysis to guide content, title and thumbnail improvements. Contributed to growth from 9 million to a peak of 19 million views per 30-day period (+111%) and 500,000 additional subscribers.
- Contributed to content and promotional initiatives associated with monthly sales revenue growth from USD 300,000 to USD 350,000; monthly YouTube advertising revenue rose from USD 20,000 to USD 28,000.
- Coordinated six editing, design and content contributors using Jira, translating analytical findings into actions and tracking delivery.

Deluxe-Spaces

Full Stack Developer | Freelance, Remote | March 2024 - February 2025

- Optimized PostgreSQL queries and database performance to improve API response times and simplify platform maintenance.
- Developed a real estate platform using React, TypeScript, Spring Boot and Kotlin, applying hexagonal architecture and integrating 360° virtual property tours.

FacturaTech Bolivia

Full Stack Developer | Santa Cruz | January 2024 - April 2024

- Automated the processing and recording of approximately 2,000 invoices per day using Express.js; developed offline invoicing monitoring features with React, NestJS and TypeScript.
- Optimized queries using TypeORM and Sequelize and managed automated deployments on Vercel.

PagoFácil Bolivia

Backend Developer | Santa Cruz | January 2024 - April 2024

- Developed automated generation and distribution of daily PDF reports using Express.js for approximately 200 companies, including transaction counts and monetary totals.
- Integrated delivery via email and the WhatsApp API; implemented Sequelize queries to populate reports and reduce manual preparation and distribution tasks.

TECHNICAL SKILLS

Python & Data Analysis: Python, pandas, NumPy; data cleaning and transformation; EDA; descriptive statistics, correlations and outlier detection; PACE methodology.

Data Quality: Data type and metric validation; reconciliation of exported records against reported totals; investigation and documentation of discrepancies.

SQL & Databases: Advanced SQL; PostgreSQL; query optimization; Sequelize and TypeORM.

Spreadsheets & Reporting: Excel; advanced Google Sheets; Tableau; charts, dashboards and KPI tracking; communicating findings to non-technical stakeholders.

Automation & Version Control: ETL workflows; automated PDF reporting; invoice processing; REST APIs; Express.js; Git and GitHub; Databricks fundamentals.

Systems Development: JavaScript, TypeScript, React, NestJS, Laravel, Spring Boot and Kotlin.

DATA ANALYTICS & SYSTEMS PROJECTS

Pharmacy Management & E-commerce System

Graduation Project | UAGRM | 2024 - 2025

- Developed a platform using Laravel, JavaScript and Tailwind CSS for sales, inventory, customer management, invoicing and administration; implemented reports and a dashboard with approximately 12 business indicators.
- Included indicators for revenue, expenses, net profit, low stock and expiration dates, and applied K-Means to group customers by patterns. Awarded second place in an academic software research and development competition, FICCT, July 2024.

EDUCATION

Degree in Systems Engineering | Universidad Autónoma Gabriel René Moreno

FICCT, Santa Cruz de la Sierra | Graduated: January 2025

ADDITIONAL TRAINING

Google Advanced Data Analytics Professional Certificate | Google / Coursera

In progress. Program covering Python, EDA, Tableau and PACE; mathematical foundations of probability and statistics, inference and hypothesis testing; linear and logistic regression; machine learning, model training, validation and evaluation, and feature engineering.

Databricks Academy | September 2026

Databricks Accredited Databricks Fundamentals (September 17, 2026) and Get Started with Databricks for Data Engineering (September 19, 2026).

Aspire Leaders Program 2026 | Aspire Institute | September 2026

Completed a 40-hour program covering leadership, critical thinking, communication and social impact.

Languages: Native Spanish; English (B2).
